USER STORIES
1. As an Organizer, I can create a rideshare group for an event so that I can share it to people that need a ride or can offer a ride.

2. As a Rider, I can Click a URL so that I can join the group and view available rides.
　　　~ If URL clicked, then asked to create an account (if no account yet)

3. As a Rider, I can click one of the available rides (and choose a seat) so that I can secure a spot for the event.

4. As a Driver, I can send a notification to the rider to ask for a confirmation.
(App automatically sends notification 10 minutes prior to ride leaving).
